

AI WeatherWise

AI-Augmented Backend Development Project

PHASE 6 – PROJECT TESTING

Team No.	05
Team ID	SWTID-2026-9139
Project Title	AI WeatherWise
Team Leader	HIBA FATHIMA S
Team Members	DIVYA SREE V, LINCYA A H, RESHMA J

1. Testing Overview

The Project Testing phase verified that the AI WeatherWise backend operated correctly after development. Each API endpoint was tested using Thunder Client to ensure successful request handling, authentication, database operations, and weather retrieval.

Testing Objective

Verify that every backend feature performs correctly before project submission by validating authentication, weather retrieval, recommendation generation, and database operations.

2. Testing Environment

Component	Tool Used
API Testing	Thunder Client
Backend	Node.js + Express.js
Database	MongoDB Atlas
Authentication	JWT
Repository	GitHub

3. API Testing Results

The major backend endpoints were tested successfully using Thunder Client.

API	Method	Expected Result	Status
Register	POST	201 Created	Passed
Login	POST	200 OK	Passed
Weather (Chennai)	GET	200 OK	Passed
Recommendation	POST	200 OK	Passed

4. Screenshot Evidence

Screenshot Placeholder
Insert your actual Thunder Client screenshots here:

- Login API (200 OK)
- Weather – Chennai API (200 OK)
- Recommendation API (200 OK)

Use the same screenshots from your Main Documentation.

5. Validation Checklist

Test Item	Result
User Registration	Verified
User Login	Verified
JWT Authentication	Verified
Weather Retrieval	Verified
Recommendation Response	Verified
Database Operations	Verified

6. Issues and Resolutions

Issue Resolution JWT authentication was verified successfully. Database connectivity was validated through MongoDB Atlas. Weather API responses were confirmed. Fallback handling ensured stable request processing.

7. Testing Outcome

The Project Testing phase confirmed that AI WeatherWise met its planned backend functionality. Authentication, weather retrieval, recommendation processing, database operations, and API responses worked successfully, making the project ready for documentation and final demonstration.
